

Offline installation

Update date: 23-Septembet-2020

Our installer downloads the following components from the Internet:

Node JS v12 –
32bit

http://monitorsanywhere.com/download/MAWi_files/node-v12.13.0-x86.msi

64bit

http://monitorsanywhere.com/download/MAWi_files/node-v12.13.0-x64.msi

IIS Express -

http://monitorsanywhere.com/download/MAWi_files/iisexpress_amd64_en-US.msi

(required only in case you are installing on Windows 10 Pro/Ent. Not required on Server 2012/2016/2019)

Web-Platform -

32bit

http://monitorsanywhere.com/download/MAWi_files/WebPlatformInstaller_x86_en-US.msi

64bit

http://monitorsanywhere.com/download/MAWi_files/WebPlatformInstaller_x64_en-US.msi

SQL Express 2014 –

64bit

http://monitorsanywhere.com/download/MAWi_files/SQLEXPADV_x64_ENU.exe

32bit

http://monitorsanywhere.com/download/MAWi_files/SQLEXPADV_x86_ENU.exe

(You can also install a more recent version of SQL Express or use your own DB server as long as it's Microsoft's MSSQL built)

ReWrite URL for IIS:

32bit

http://monitorsanywhere.com/download/MAWi_files/rewrite_x86_en-US.msi

64bit

http://monitorsanywhere.com/download/MAWi_files/rewrite_amd64_en-US.msi

EnableIISFeatures:

https://monitorsanywhere.com/download/MAWi_files/EnableIISFeatures.bat

In case your network blocks the download of the required components, please follow the steps below before you run the MAWi installer:

1. Enable .NET Framework 3.5 from 'Add Programs and Features' console.

If it requires a download of Windows Updates and these are blocked, please download the cab file from here:

http://monitorsanywhere.com/download/MAWi_files/microsoft-windows-netfx3-ondemand-package.cab

Copy the CAB file to C:\

Open CMD with admin privileges and copy-paste this line:

```
Dism.exe /online /enable-feature /featurename:NetFX3 /source:C:\ /LimitAccess
```

2. Run the EnableIISFeatures. Might take several minutes. (Right click on the batch file and select 'Run as Admin')
3. Install Node JS v12 (default, next on everything)
4. Install Web-platform (default, next on everything)
5. IIS Express (default, next on everything)
6. SQL Express (default, next on everything)
7. Install the RewriteURLIIS (default, next on everything)

Download MAWi from the downloads folder.

Follow the steps as shown here:
